

THE TRADING ROUTINE

Professional Trading Scholarship

From Market Foundations to Advanced Execution

The Trading Routine

Professional Trading Scholarship

Build understanding. Build discipline. Trade with structure.

— Who We Are

The Trading Routine is a professional trading scholarship built to develop **real market understanding**, not gambling behavior.

We focus on:

- Market structure
- Price behavior
- Risk management
- Trader psychology
- Long-term consistency

This program is designed for **serious students** who want to trade with logic, patience, and structure.

— Experience & Credibility

I have **over 5 years of real experience** in the financial markets.

During these years, I have:

- Traded multiple market conditions (bull, bear, range, high volatility)
- Studied institutional behavior and market structure
- Experienced real drawdowns and recoveries
- Built and refined structured trading systems
- Learned what actually works — and what doesn't

This scholarship is built on **experience, not theory only**.

— Our Philosophy

We do NOT:

- Sell dreams
- Promise guaranteed profits
- Teach random indicators
- Encourage overtrading

We DO:

- Teach **how markets really move**
- Focus on **price first**
- Build traders step by step
- Emphasize **risk control before profits**
- Train discipline and patience

— What Markets We Teach

We teach **CFD markets**, including:

- Forex (Major & Minor pairs)
- Commodities (Gold, Oil, etc.)
- Indices (US30, NASDAQ, S&P500, DAX...)
- Selected CFDs with clear structure

What is CFD?

CFD (Contract for Difference) allows traders to speculate on price movement **without owning the asset**, both up and down, with flexible position sizing.

— Market Structure Comes First

Before any entry, we teach students to understand:

- Trend vs Range
- Higher Timeframe bias
- Market phases (Accumulation, Expansion, Distribution)
- Liquidity behavior
- Key levels and zones

If you don't understand structure — entries don't matter.

— Full A-Z Learning Path

This scholarship teaches trading **from absolute zero to advanced level**.

No gaps.

No skipping steps.

No confusion.

— Phase 1: Foundations

Students start with **the basics**:

- What is trading?
- How markets work
- Buy vs Sell logic
- Orders (Market, Limit, Stop)
- Spread, commission, leverage
- Trading platforms basics
- Trading sessions & volatility

— Phase 2: Candlestick Mastery

We teach **Japanese candlesticks in depth**:

- Candle anatomy
- Bullish vs bearish psychology
- Rejection vs acceptance
- Momentum candles
- Indecision candles
- Context > candle pattern

Candlesticks are taught **as information**, not magic patterns.

— Phase 3: Market Structure

Students learn:

- Higher highs / lower lows
- Break of structure (BOS)
- Change of character (CHOCH)
- Internal vs external structure
- Trend continuation vs reversal

This is the backbone of professional trading.

— Phase 4: Key Levels & Zones

We teach how to identify:

- Support & resistance
- Supply & demand
- Liquidity zones
- Previous highs & lows
- Discount & premium areas

Students learn **where price reacts and why**.

— Phase 5: Liquidity & Price Behavior

Advanced understanding of:

- Stop hunts
- Liquidity grabs
- False breakouts
- Why price moves fast
- Why price retraces before continuation

This phase explains **what most retail traders don't see**.

— Phase 6: Entries & Execution

Only after structure is clear, we teach:

- Entry models
- Confirmation logic
- Stop-loss placement

- Take-profit logic
- Risk-to-reward planning
- Trade management

Execution is built on **logic, not emotions**.

— Phase 7: Risk Management

This is **non-negotiable**.

We teach:

- Position sizing
- Fixed vs dynamic risk
- Drawdown control
- Risk per trade
- Capital protection
- Survival mindset

A trader who protects capital **stays in the game**.

— Phase 8: Psychology & Discipline

Trading is not only charts.

We train:

- Emotional control
- Patience
- Consistency
- Dealing with losses
- Avoiding revenge trading

- Building a professional routine

Discipline is trained **daily**, not explained once.

— Phase 9: Advanced Concepts

For advanced students:

- Multi-timeframe alignment
- Session-based trading
- News & volatility behavior
- Advanced structure reading
- Trade refinement & optimization

This is where traders become **sharp and selective**.

— How We Teach

- Step-by-step progression
- Clear examples
- Real chart breakdowns
- Practical logic
- Repetition and structure
- No information overload

Students are guided **hand by hand**, not thrown into complexity.

— Who This Scholarship Is For

- ✓ Beginners who want a real foundation
- ✓ Intermediate traders stuck in losses

- ✓ Traders who want structure & clarity
- ✓ People serious about long-term trading

- ✗ Not for gamblers
- ✗ Not for “get rich quick” mindset

— Our Goal

Our goal is simple:

Create disciplined traders who understand the market, manage risk, and trade with confidence and structure.

Not signals followers.

Not emotional traders.

Independent decision-makers.

— Final Message

Trading is a skill.

Skills are built with:

- Education
- Experience
- Discipline
- Time

The Trading Routine is not a shortcut —
it is a **professional path**.
